Full Stack Engineer

Full Stack Engineer specializing in JavaScript and React for building scalable, responsive web applications. Experienced in developing component-driven UIs, integrating REST APIs, and optimizing performance. Strong collaborator with a background in technical troubleshooting and delivering user focused solutions.

Technical Skills

JavaScript, HTML5, CSS3, Python, React, Responsive Design, Component Architecture, Node.js, Express.js, REST APIs, Git, GitHub, VSCode, Figma, Vite, MongoDB

Software Engineering Projects

WardrobePilot Full Stack Web App | [github](#) | [weatherapp](#)

A weather-driven outfit recommendation platform that personalizes wardrobe management using real-time data.

- Built a full-stack application integrating a weather API to generate outfit recommendations based on current conditions.
- Implemented secure authentication and user profile management for personalized wardrobe tracking.
- Tech Stack: JavaScript, Node.js, Express, MongoDB, Weather API, HTML5, CSS3

News Explorer Full Stack Web App | [github](#) | [DailyNews](#)

A full-stack application that allows users to search, save, and manage news articles with personalized accounts.

- Developed a full-stack web app integrating a news API to enable dynamic article search and display.
- Implemented secure authentication and user account management for personalized experiences.
- Tech Stack: JavaScript, Node.js, Express, MongoDB, REST APIs, HTML5, CSS3

SmartProfile Web App | [Github](#)

A modular web application for managing user profiles with dynamic, API-driven content updates.

- Improved user interaction efficiency by 40% by building a modular JavaScript application integrating REST APIs for real-time profile management.
- Reduced code duplication and increased maintainability through reusable UI components using component-based architecture and BEM CSS methodology.
- Tech Stack: JavaScript (ES6+), HTML5, CSS3 (BEM), REST APIs

Professional Experience

Software Engineering Fellow TripleTen | Remote

Jan 2025 - Present

- Built and deployed full-stack web applications using JavaScript, React, Node.js, Express, and MongoDB throughout the software development lifecycle.
- Applied object-oriented programming principles, reusable components, REST APIs, and modular architecture to develop scalable and maintainable applications.

Network Services Technician AT&T | Columbus, OH

April 2022 - Present

- Provision, configure, and troubleshoot fiber internet services for 150+ residential and commercial clients, maintaining a 98% first-time activation success rate.
- Increase customer satisfaction by 30% by educating clients on router configuration, network performance, and Wi-Fi optimization.
- Reduce service callbacks by 25% by proactively diagnosing connectivity issues and troubleshooting network equipment during installations.

Oracle Database Administrator Contractor J.P. Morgan Chase | Columbus, OH

Jan 2022 - April 2022

- Managed and optimized Oracle database environments to ensure high availability, performance, and data integrity, reducing system downtime by 25% through proactive monitoring, troubleshooting, and performance tuning.
- Implemented and maintained backup and recovery solutions using RMAN, safeguarding critical data and minimizing data loss and system downtime during failures.

Logistics Associate PepsiCo/Frito-Lay | Aberdeen, MD

Dec 2019 - April 2022

- Supported high-volume warehouse and distribution operations using inventory management systems in a fast-paced environment.
- Maintained accuracy, efficiency, and safety standards while processing and fulfilling customer orders.

Education

Bachelor of Science Computer Science, Tiffin University

Expected Graduation 2027

Software Engineering Certificate, TripleTen

2026

Bachelor of Science Information Technology, United Methodist University

2017
