Full Stack Engineer

Full Stack Software Engineer specializing in JavaScript, React, Node.js, Express.js, and MongoDB for building scalable, responsive web applications. Experienced in REST APIs, authentication systems, and component-based architecture with a background in technical troubleshooting and network support. Strong collaborator focused on developing user-centered applications that improve performance, usability, and overall user experience.

Technical Skills

Languages: JavaScript, HTML5, CSS3, Python, SQL,

Frontend: React, Next.js, Responsive Design, Component Architecture

Backend: Node.js, Express.js, REST APIs, Authentication

Database: MongoDB, Oracle Database, Tools: Git, GitHub, VSCode, Figma, Vite

Concepts: Object-Oriented Programming, API Integration, Agile Development, SDLC

Software Engineering Projects

WardrobePilot Full Stack Web App | [github](#) | [weatherapp](#)

A weather-driven outfit recommendation platform that personalizes wardrobe management using real-time data.

- Developed a responsive full-stack MERN application integrating weather APIs, authentication systems, RESTful services, and dynamic UI rendering for personalized outfit recommendations.
- Implemented secure authentication and user profile management for personalized wardrobe tracking.
- Tech Stack: JavaScript, Node.js, Express, MongoDB, Weather API, HTML5, CSS3

News Explorer Full Stack Web App | [github](#) | [DailyNews](#)

A full-stack application that allows users to search, save, and manage news articles with personalized accounts.

- Developed a responsive full-stack web application integrating news APIs to enable dynamic article search, personalized content management, and improved user experience.
- Implemented secure authentication and user account management for personalized experiences.
- Tech Stack: JavaScript, Node.js, Express, MongoDB, REST APIs, HTML5, CSS3

Professional Experience

Software Engineering Fellow TripleTen | Remote

Jan 2025 - Present

- Developed and deployed responsive full-stack web applications using React, Node.js, Express.js, MongoDB, and REST APIs within Agile development environments.
- Applied object-oriented programming principles, reusable components, REST APIs, and modular architecture to develop scalable and maintainable applications.

Network Services Technician AT&T | Columbus, OH

April 2022 - Present

- Provisioned, configured, and troubleshoot fiber internet services for 150+ residential and commercial clients with a 98% first-time activation success rate.
- Increased customer satisfaction by 30% through router configuration support, Wi-Fi optimization, and network troubleshooting.
- Reduced service callbacks by 25% by proactively diagnosing connectivity issues and troubleshooting network equipment during installations.

Oracle Database Administrator Contractor J.P. Morgan Chase | Columbus, OH

Jan 2022 - April 2022

- Managed and optimized Oracle database environments to ensure high availability, performance, and data integrity, reducing system downtime by 25% through proactive monitoring, troubleshooting, and performance tuning.
- Implemented and maintained backup and recovery solutions using RMAN, safeguarding critical data and minimizing data loss and system downtime during failures.

Logistics Associate PepsiCo/Frito-Lay | Aberdeen, MD

Dec 2019 - April 2022

- Supported high-volume warehouse and distribution operations using inventory management systems in a fast-paced environment.
- Maintained accuracy, efficiency, and safety standards while processing and fulfilling customer orders.

Education

Bachelor of Science Computer Science, Tiffin University

Expected Graduation 2027

Software Engineering Certificate, TripleTen

2026

Bachelor of Science Information Technology, United Methodist University

2017
